

Spotfire JV Audit Dashboard Process

- Closing the Loop - JV Audit Dashboard Reporting Process

- Accessing relevant data
- Act quickly
- Confidence/building data integrity

- Versus Excel

- Enforce compliance by applying strict rules over data
- Works directly with original data – no data silos
- Confidence/building data integrity
- Interactive charts for users to drill down into the data
- Wide range of visualisations in understanding the data
- Easy to build visual analytic tools and build it once

- But Excel does this very well...

- Collecting data
- Organising data
- and preparing data for offline analysis

- Additional benefits...

- Reporting automation
- Moving to managing the audit vs audit managing us
- Focus on bridging knowledge with Finance Business Partners
